## ■ 特点

- ◎本产品是一款漏电保护开关，对其出线端配置的用电设备提供漏电保护，其采用优质原材料、带电源指示、自由脱扣机构制造而成。一旦配用的电器出现漏电故障，该产品的零序互感器将检测到的信号输入电子线路，当该漏电流大于漏电动作电流值时，电子线路输出信号使脱扣机构动作，切断电源，以达到保护人身和设备的目的。
- ◎本产品按GB16916等国家标准设计，工作原理可靠，对漏电故障反应灵敏，无论是在相线（火线）还是在中性线（零线）均可进行漏电保护，符合广大国内用户需求。

## FEATURES

- ◎This product is a residual current protection switch, the outlet of the electrical equipment to provide residual current protection, it used of excellent raw materials, with power instructions, free tripping made to institution. Once the electrical appliances associated with leakage failure, the zero sequence transformer will detect the signal input to the electronic circuit, when the residual current current is greater than the residual current current, the electronic circuit output signal to the trip mechanism action, cut off the power to achieve the purpose of protecting the person and the equipment.
- ◎This product is designed according to GB16916 and other national standards, working principle is reliable, sensitive to residual current failure, whether in the phase line (Fire Wire) or in the neutral line (zero line) can be residual current protection, in line with the needs of the majority of domestic users.
